Advanced Tactics Inc. Awarded Contract for the Air Force Research Laboratory Special Ops Transport Challenge

EL SEGUNDO, California, 14 June 2012 – Advanced Tactics Inc., a pioneering company in the development of roadable vertical takeoff and landing technologies, today announced that it was awarded a contract for the Air Force Research Laboratory (AFRL) Special Ops Transport Challenge. The program aims to leverage Advanced Tactics' unique roadable vertical takeoff and landing vehicle technology to solve the challenge put forth for the Special Ops Transport Challenge, announced last fall.

The primary goals of the challenge are as follows:

- Transport at least two people and their equipment (700 lb total) without being detected
- Provide transport and safe return over a distance of at least 30 kilometers over rugged, mountainous terrain
- Permit packaging for delivery or shipping in the CV-22 cargo hold
- Be able to transition from storage to operation in under four hours
- Operate autonomously in day/night and inclement weather conditions
- Consider OSHA and Air Force safety standards for manned vehicles

Advanced Tactics' platform utilizes a unique distributed lift design and is expected to meet or exceed all goals of the challenge. The awarded contract will fund an effort to study and design the objective vehicle as well as prototype and test some of the system's critical elements.

Work on the contract will begin immediately and will be performed at Advanced Tactics' headquarters in El Segundo, California. The work is expected to be completed within 9 months.
